

The Report

“Mesh Crop Covers for Non-Chemical Potato Pest & Disease Control. Interim results” June 2017. Report number 6-2017

has been replaced by the final report

“Mesh Crop Covers for Non-Chemical Potato Pest & Disease Control: Final results from the 2016-17 Field Trial of Mesh vs. Agrichemicals” August 2017. Report number 8-2017

Which can be down loaded from

<http://www.bhu.org.nz/future-farming-centre/ffc/information/crop-management/production/mesh-potatoes/mesh-crop-covers-final-results-from-the-2016-17-potato-field-trial-of-mesh-vs-agrichemicals.pdf>

The final report contains a range of new and updated information as well as being reordered to make it more user-friendly, so the interim report has been withdrawn. If, however, you need a copy of the interim report please contact Merf at charles.merfield@bhu.org.nz with the reason you need a copy of the interim report.
